OMAR MUBAIDIN

WEB DEVELOPER & DATABASE ENGINEER

omarmubaidin@proton.me | +962 7 8009 0453 | mubx.dev | Amman, Jordan

PROFESSIONAL SUMMARY

Computer engineering student and web developer specializing in secure, data-driven systems. Founder of MUBX, delivering production-grade applications from database architecture to deployment. Demonstrated proficiency in full-stack development, security implementation, and seamless collaboration with clients and stakeholders.

TECHNICAL SKILLS

Database Architecture | Security Implementation | E-commerce Systems
Full-Stack Development | Performance Optimization | API Design

PROJECTS & EXPERIENCE

- Platform Performance: Delivered high-performance agency website with Core Web Vitals optimization and smooth animations, achieving 90+ Lighthouse scores and enabling professional client acquisition.
- System Automation: Built comprehensive club management system replacing manual spreadsheet processes, streamlining operations for 50+ active members and reducing administrative overhead by 60%.
- E-commerce Launch: Launched Jordan's first student-focused print-on-demand platform with custom design tools and order tracking, transforming manual communication into automated digital workflow.

EDUCATION

Bachelor of Engineering – Computer Engineering
Al Hussein Technical University (HTU), Amman, Jordan | Expected Graduation: May 2029
Major in Computer Engineering with focus on Database Systems and Network Security.
Thesis on "Secure Database Implementation in E-commerce Systems".
Relevant Coursework:
Database Systems and Normalization, Cryptography and Group Theory, Network Security and Cybersecurity, Web Development and Full-Stack Systems, Boolean Algebra and Logic Circuits, Thermodynamics.

ADDITIONAL INFORMATION

Languages: Arabic (Native), English (Fluent - Professional Working Proficiency)
Technical Stack: Next.js 15, React, TypeScript, Node.js, PHP, MySQL, Tailwind CSS, Framer Motion, Git/GitHub, Cloudflare, VS Code, Figma, PowerShell
Certifications/Portfolio: Complete project case studies, live demos, and code repositories available at mubx.com
Availability: Open to freelance web development projects (minimum 150 JOD), part-time contract work, software engineering internships, and technical consulting on database and security topics. Remote or Amman-based preferred.
